To
Salling Group

April 13, 2023

Dear Frederik,

I am writing to express my interest in the position of Praktikant til Ecommerce and Cloud operations. As a Junior DevOps Engineer with experience in vulnerability management, containerization, deployment, and integration of vulnerability scanners in dynamic development environments, I am confident in my ability to contribute to the success of your team.

I have extensive experience with AWS, Azure and GCP. Additionally, I am certified in FinOps, Microsoft Azure, and AWS DevOps Engineering. I also have experience working with Kubernetes, Docker, and GitLab.

In my previous role as a DevOps Engineer Intern at Plejd AB, I gained valuable experience in vulnerability management detection and response, integration of vulnerability scanners in dynamic development environments, and containerization and deployment. I am excited to bring my skills and experience to Salling Group and contribute to the success of your team.

I have lived and worked in Kalundborg, Denmark for 5 years, giving me a unique perspective on the culture and values of the region. Thank you for considering my application. I look forward to the opportunity to discuss my qualifications further.

Thanks in advance!

Noah H. Liu
